

## RING SIZE CHART

Please read these instructions before printing:

1. Make sure that your print size is correct.  
Page Scaling is set to "none".

2. You can verify that the size is printed correctly by measuring it with a ruler. It should measure exactly 5cm.

3. The measurement should be very precise.  
If the measurement on the left doesn't show exactly 5cm, please check your page set up, fix the page scaling and print again.

1. Choose one of your rings.

In case you are buying a ring as a surprise for someone, try to borrow the ring from this person.

Make sure that you are using the ring for a correct finger.

2. Put the ring on this paper so that the inside diameter of the ring fits with one of the circles shown in the chart here.

3. If your ring doesn't fit perfectly in any circle, or if you are doubting between two sizes, choose the larger measure.

4. Write the size down.
